### \* Our Work

The Moonlight Public School. Established in 2009, our institution aims to provide quality education with an affordable fee structure. Currently, our school has a strength of 96 students in preschool and 227 students in the primary section. We conduct a variety of activities for the physical and mental development of our students, including yoga, dance, and sports events, which promote fitness, teamwork, and discipline. We also emphasize environmental awareness through initiatives such as paper bag making and eco-friendly Ganpati idol preparation. Our students benefit from educational field visits to places like Empress Botanical Garden and Shivrushti, helping them connect with nature and understand history better. They actively participate in inter-school competitions and Sea Cadets training, which enhances their confidence and discipline. In addition to internal examinations. Our students take part in external competitions such as SOF and Rangotsav, where they have consistently performed well.
